How to build your Christmas Paper House

1

PRINT

Print pages 1-2 for the color version, or pages 3-4 to color your own.

2

CUT

Cut carefully around every solid outside line. Keep all glue tabs attached.

3

FOLD

Pre-fold every dashed line. A ruler can help make neat folds.

4

GLUE WALLS

Join the front, back and side walls using the side glue tabs.

5

ADD ROOF

Fold the roof along the center line and glue it to the top edges of the walls.

6

FINISH

Add the chimney. Decorate with cotton snow, glitter or your own drawings if you like.

Adult help recommended for cutting.

Use child-safe scissors and ordinary craft glue. Let glued parts dry before handling.
